All New ELECTRICAL CURRICULUM

THE TIMELINE

July 1, 2023 Official Mike Holt Launch for all Electrical Apprentices (online)

2023-2024 School Year - All Year 1 Electrical Apprentices Receive MHE Curriculum. Years 2-4 continue with NCCER

July 1, 2024 - Official price increase for all Year 1 & 2 in-person and all online students. Price will be \$1,095 per apprentice

2024-2025 School Year - All Year 1 & 2 Electrical Apprentices Receive MHE Curriculum.

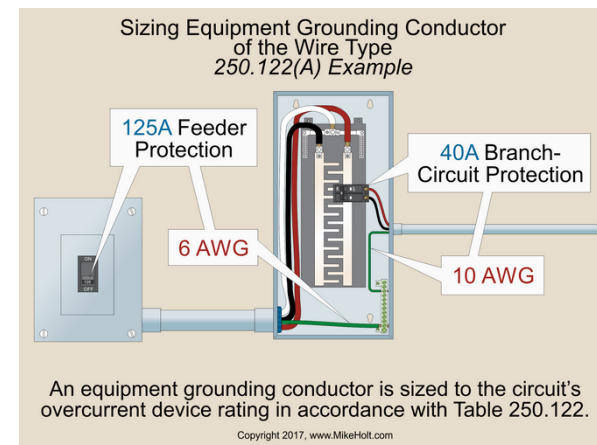

THE CURRICULUM

The Mike Holt Enterprises curriculum is made by electricians for electricians. The MHE program will remain in a four-year format and 144 per year. Each level takes a National Electric Code approach and includes all required textbooks as well as a 2020 NEC book.

Products from MHE are designed as follows:

- The text is easy to understand and includes clear step-by-step detailed explanations to help simplify difficult concepts.
- All products are supported by full-color detailed illustrations to help students visualize the concept being taught. (seen to the right)
- Our Instructor Resources save teachers time and give them tools to be more successful in reaching their students.

Not only is all curriculum NEC-based, fourth-year electrical students also will also receive specialized Journeyman exam preparation as well as practice Journeyman tests. The new program will also include student login portals where they can see grades and attendance whenever they need to.
