Information

What is GLS?

GLS is a collection of partnerships between New Horizons Career & Technical Center and local Employers looking to improve the way they recruit, hire, train, and most importantly retain their entry level new hires out of high school.

What Do We Do?

Provide a robust talent pipeline of local seniors looking to transition from high school to full-time employment (with benefits) in various career pathways. Ultimately, the GLS program seeks to establish a reliable and sustainable pipeline to help satisfy the hiring needs of participating GLS Employer Partners. Since 2017, the GLS candidate pool at New Horizons continues to grow and improve year after year.

Cued-In Technology

At the beginning of 2020, the CUED-IN mobile/web-based app was implemented to improve the efficiency of the recruiting and application process. Employers build a Company profile that is accessible by the GLS Candidate Pool. Each Company can add detailed information about open positions, pay, benefits, and career pathways within the organization. Employers will utilize this tool to better engage and recruit with the candidates.
