

WHITNEY CALCULUS SYLLABUS

MTH 263/264

Calculus I/II

School Year 2023-2024

Course Information

Purpose: This is a two semester basic Calculus sequence.

Intended Audience: Students intending to pursue an undergraduate degree in engineering, mathematics, statistics, computer science, or physical sciences. This course is delivered face-to-face at the Governor's School.

Course Description and Credit Hours

(4 credits per course) Students are required to have a graphing calculator for this course. The TI-83 or TI-83 Plus is recommended. Prerequisite(s): MTH 161 and MTH 162 or equivalent with a grade of C or better.

Calculus 1: Presents concepts of limits, derivatives, differentiation of various types of functions and use of differentiation rules, application of differentiation, antiderivatives, integrals and applications of integration. Lecture 4 hours per week. THIS IS AN APPROVED UCGS/PASSPORT COURSE.

Calculus 2: Continues the study of calculus of algebraic and transcendental functions including rectangular, polar, and parametric graphing, indefinite and definite integrals, methods of integration, and power series along with applications. Features instruction for mathematical, physical and engineering science programs. Lecture 4 hours per week. THIS IS AN APPROVED UCGS/PASSPORT COURSE.

Instructor Information

Name: Kenya Whitney

Email: kenya.whitney@nhrec.org

Office Hours: Wednesdays, 9:40am - 10:25am & 12:20pm - 1:05pm

Office Location: A76

Zoom Link:

<https://nhrec-org.zoom.us/j/6261965342?pwd=RjdZWVRMZkRLQW5xT3ZRSXh3NE5RQT09>

Text(s) and Materials

Title: Calculus Early Transcendentals

Authors: Stewart

Publisher: Cengage

Edition: 7th

Required or Recommended: Required

WHITNEY CALCULUS SYLLABUS

Course Materials

You do NOT have to purchase the textbook! You'll occasionally need a calculator in this course. I recommend a graphing calculator, but a scientific calculator will suffice. We will not use calculators on exams.

Course Policies

Homework assignments will be assigned regularly. Check your course calendar.

Quizzes will be paper and pencil based. Total of 6 quizzes.

Tests: There will be six tests. There will be no retests. Students are NOT allowed to use calculators on exams.

Lab: These labs are designed to provide hands-on activities, tests reviews, and collaborative supporting activities that will further your understanding of calculus.

Required Time-on-Task

This course is very intensive; 5 hours (outside of lecture) per week to study are required for successful completion of this course. Plan your semester so that you have enough time to be successful and time to get help when needed.

Grading/Evaluation Policy

Your final course grade is determined as the weighted average of the following:

Homework 10%

Quizzes 30%

Exams 45%

Lab 15%

The following grade average scale will be used to determine your final grade:

90 – 100%: A 80 – 89%: B 70 – 79%: C 60 – 69%: D Below 60%: F

Late Work Policy

Homework assignments are expected to be completed by the due date.

Automatic extensions of one week from the original due date will be granted with a 10% penalty. Extensions beyond this will be subject to instructor's discretion.

Make-Up/Missed Test Policy

Students are expected to take tests in class, on the specified date (exceptions made for students with accommodation letters). If there are mitigating circumstances, contact me BEFORE the test if possible and provide documentation. In general, no make-up tests will be given (an exception may be made, but not more than once per student during the semester, if the circumstances warrant it and you notify me before or on the test date, and you are able to take the

WHITNEY CALCULUS SYLLABUS

test within two days of the scheduled date). No make-up test will be given to any student who does not show up on the test date and has not contacted the instructor. With the instructor permission make-ups be given after the tests have been returned.

Important Dual Enrollment Dates

Fall 2023 Semester (MTH 263)

- Friday, September 15, 2023: Last day to register for college credit
- Wednesday, October 4, 2023: Last day to drop dual enrollment and class will not appear on the student's college transcript
- Friday, December 1, 2023: Last day to drop dual enrollment and class will appear as a "W" on the student's college transcript
- Tuesday, February 2, 2024: Grades posted to SIS

Spring 2023 Semester (MTH 264)

- Monday, January 29, 2024: Last day to register for college credit
- Friday, February 16, 2024: Last day to drop dual enrollment and class will not appear on the student's college transcript
- Friday, April 19, 2024: Last day to drop dual enrollment and class will appear as a "W" on the student's college transcript
- Friday, June 14, 2024: Grades posted to SIS

College Math Expectations

In order for you to be successful in your mathematics courses, the faculty of the mathematics department has developed the following common expectations of all students in mathematics Courses.

1. College mathematics is different than high-school mathematics. College mathematics courses cover at least triple the material in the same time frame as do high school mathematics courses. A certain amount of material has to be covered during each class and over the semester. To maintain this pace, you need to take responsibility for your own learning. This includes, but is not limited to:
 - Having all required materials (e.g. textbook, a calculator required in the course syllabus, software course registration code, an access to a reliable computer with internet available at GSST or at home) the first day of class.
 - Reading the syllabus/Calendar/Assignments documents completely.
 - Logging in on CANVAS at least twice a week to check for Announcements, Assignment updates, and your grades, and checking VPCC email daily.
 - Reading the textbook section to be covered before coming to class, viewing any video lecture if available, listening to the lecture and taking notes, reviewing notes provided on CANVAS for each section.
 - Assign for study at least 5 hours outside of class per week for each week.

WHITNEY CALCULUS SYLLABUS

- There is no substitute for continued and ongoing studying and doing homework problems. If you do not do all the assigned homework problems, your chances of success in any math class are very low.
2. It is your responsibility to keep your homework up-to-date and monitor your success. If you are having difficulty with the course material, then you need to take action right away – do not wait until you have lost all hope! There are several options to get assistance:
- Talk to your instructor during office hours.
 - Form a study group with your classmates - this is the best thing you can do for yourself whether you are struggling or not.
 - Visit Brainfuse online using myVPCC website to access tutors. Tutor information and hours are available at <http://libguides.tncc.edu/tutoring>
 - No Generative AI Usage Permitted
 - For the duration of this course, the use of Generative AI in assignments is strictly prohibited.
 - Assignments are opportunities for personal growth, critical thinking, and applying your acquired knowledge. Your individual effort and creativity are essential in demonstrating your understanding of the course material. Dependence on AI undermines these objectives and compromises the integrity of the learning process. We appreciate your commitment to academic honesty and dedication to upholding this course's principles by refraining from using Generative AI in your assignments.

Course Attendance Policy

Since this is a face-to-face class, attendance is measured in the traditional way: by attending class.

Calendar of Course Activities

The following schedule is subject to change as needed at the discretion of the instructor. Changes will be announced on Canvas.

Week 1-3 Unit 1 Quiz 1 Test 1

Week 4-6 Unit 2 Quiz 2 Test 2

Week 7-9 Unit 3 Quiz 3 Test 3

Week 10- 12 Unit 4 Quiz 4 Test 4

Week 13-15 Unit 5 Quiz 5 Test 5

Weeks 16-18 Unit 6 Quiz 6 Test 6

Any changes to the course calendar will be announced in class.

Cheating Policy

If a student cheats on an assignment, they will receive a 0 on that assignment, and the incident will be reported.

Student Learning Outcomes Calculus I

Upon completing the course, the student will be able to:

WHITNEY CALCULUS SYLLABUS

Limits:

- Differentiate between the limit and the value of a function at a point
- Find the limit of a function by numerical, graphical and analytic methods
- Apply Limit Laws
- Calculate one-sided limit of a function
- Prove the existence of a limit using precise definition of the limit
- Determine the continuity of a function
- Calculate Vertical and Horizontal asymptotes using limits

Derivatives and Differentiation Rules:

- Define Derivatives and Rates of Change
- Compute derivatives of basic functions using the definition of the derivative
- Differentiate polynomial, rational, radical, exponential and logarithmic functions
- Find equation of a tangent line using derivative
- Differentiate trigonometric functions
- Apply product, quotient, chain rules
- Apply implicit differentiation and find derivatives of inverse trigonometric functions
- Apply concept of rates of change to natural and social sciences
- Apply the concept of related rates
- Define hyperbolic functions and their derivatives
- Find linear approximation of a function at a given point

Applications of Differentiation

- Calculate local and absolute maximum and minimum values of a function
- Apply Rolle's Theorem and Mean Value Theorem to study properties of a function
- Find critical points, and intervals of increasing and decreasing values of a function
- Find points of inflection and intervals of different concavities
- Sketch a curve for a given function
- Apply rules of differentiation to solve optimization problems
- Find antiderivatives for basic functions using knowledge of derivatives

Integrals

- Relate areas to definite integrals using sigma notation, Riemann Sums, and limits. [Note: L'Hopital's Rule is in Calc II but may be used for instructional purposes here.]
- Apply Fundamental Theorem of Calculus to find definite integrals and derivatives
- Find indefinite integrals of polynomials and basic trigonometric and exponential function
- Apply Net Change Theorem
- Perform integration using substitution rule
- Find areas between curves
- Find average value of a function

Student Learning Outcomes Calculus II

Upon completing the course, the student will be able to:

WHITNEY CALCULUS SYLLABUS

Applications of Integration

- Compute Volumes by cross-section
- Compute Volumes by disk-washer
- Compute Volumes by shells
- Compute Work (spring, rope)
- Compute Work (pumping liquids)
- Compute Arc length
- Compute Areas of surfaces of revolution
- Compute Application (center of mass)

Techniques of Integration

- Integrate by parts
- Calculate trigonometric integrals
- Calculate integrals by trigonometric substitution
- Define the indeterminate form and apply L'Hopital's Rule.
- Calculate improper integrals
- Integrate by partial fractions
- Integrate using Tables and Software
- Approximate integrals (Trapezoidal, Simpson) with error estimation.

Infinite Sequences and Series

- Write definition of and understand Sequences
- Write definition of and understand Series (intro)
- Determine convergence by integral test
- Determine convergence by comparison test
- Determine convergence of alternating series
- Determine absolute convergence (ratio, root tests)
- Apply strategies for testing series
- Work with power series
- Represent functions as power series
- Find Taylor, Maclaurin series & polynomials
- Calculate Taylor and Maclaurin series

Parametric Curves and Polar Coordinates

- Represent curves by parametric equations
- Perform calculus with parametric curves
- Use and graph with polar system
- Calculate areas and lengths in polar coordinates
- Define the conic forms in polar form

Communication Policies

Students are encouraged to communicate with their instructors via Canvas. When communicating outside of Canvas by email, students must use their GSST e-mail account when contacting their instructor, other offices at the college, or interacting with classmates. When communicating with instructors outside of Canvas, students should include the course and section number in text of the message. Students are responsible for checking their Canvas inbox and their GSST/VCCS e-mail account regularly, daily at a minimum.

WHITNEY CALCULUS SYLLABUS

Instructor Email Response Policy

Email from students will be returned by the instructor within 24 hours during weekdays and within 48 hours on weekends.

GSST Policies

Students should refer to the [Student Handbook](#) for the full list and explanation of GSST policies related to students.

Accessibility Accommodations

GSST operates in compliance with the Americans with Disabilities Act.

Academic Honesty

It is imperative that students maintain a high degree of individual honor in their scholastic endeavors. Scholastic dishonesty will not be condoned under any circumstances. Generally, scholastic dishonesty is interpreted as cheating on an examination or quiz, which includes giving or receiving information; copying, using unauthorized materials in tests; collaborating during examinations; substituting for another person or allowing substitutions during examination; plagiarizing or submitting work other than one's own; and colluding with another person or persons in submitting work for credit unless such collaboration is approved in advance by the instructor. Webster's Third International Dictionary defines plagiarism as follows: "Plagiarism--to steal and pass off, as one's own the ideas or words of another; to use without crediting the source; to present as new and original an idea or product derived from an existing source; to commit literary theft."

Technology Policy

Students in all modalities (face-to-face, hybrid, and online) will need access to a desktop or laptop computer and an internet connection suitable for using Canvas and other online resources necessary for success in their courses. Students who experience unexpected outages or other technology issues should contact their instructor as soon as possible. If email is unavailable, students should use other communication methods, such as the instructor's phone number.

Inclement Weather Policy

In the event of inclement weather, the GSST provides delay and cancellation information to local radio and television stations. If a student is still experiencing difficulties in transmission of Canvas assignments due to power or other outages, they should contact the instructor as soon as it is safe to do so via email, or call the instructor by phone, to resolve questions and concerns in a timely manner.

Attendance may affect overall course grade based on course-specific attendance policies. As per the Student Handbook, "students have the obligation to initiate their own withdrawals from classes" using the Student Information System (SIS).

WHITNEY CALCULUS SYLLABUS

Students can withdraw up until the date listed on the academic calendar for the term using SIS or Navigate.

For Dual Enrollment Courses

Dual Enrollment Statement

The decision to dual-enroll in a course requires careful consideration. You have options, as you can see from the [DE module](#) on Faculty Advising Canvas course. You may wish to contact your top choice colleges to ask what the impact of taking a dual-enrollment course might be for your goals, particularly if you do not perform to your expectations in the course. Please be aware that you are generating a permanent college transcript with all the courses for which you are dual-enrolled. You can also use the dual-enrollment student guide from [Transfer Virginia](#) to help you determine the potential impact.

If you choose to dual-enroll, you must monitor your course grade. If you find you are not earning grades you want to have on your permanent college transcript, you may consider dropping the dual-enrollment portion prior to the Add/Drop date for the term of the course, or to withdraw from the dual-enrollment portion prior to the Withdrawal date. If you choose to withdraw from dual enrollment for the class, you will still earn high school credit and can plan to be well-prepared for the class in college. Dropping will have no record on your transcript, while withdrawal will leave a note on your college transcript indicating you withdrew, but no grade will be recorded on your college transcript. You can request a decline or withdrawal form from me or from Mrs. Yee.

No matter what you choose to do, I will respect your wishes. I want to work with you to support your learning, but I cannot learn the information for you; you will have to invest effort in the course in order to succeed. This may require you to learn new learning strategies that you haven't used in the past. I will do my utmost to support your personal learning in the class and encourage you to pursue your goals.

Check your the GSST email and Canvas for current news and offerings.

WHITNEY CALCULUS SYLLABUS

Math Parent & Student Signature Page

Please return this sheet to Ms. Whitney no later than 09/04/23

Students: Please read these guidelines carefully, then sign below and have a parent sign. If you have any questions now or during the year about acceptable assistance, ask your teacher.

Communication between students, teachers, and parents is very important to a successful school year. Students have received a syllabus, which they are expected to review with parents. It was reviewed with Ms. Whitney in class and students had an opportunity to ask questions during class.

Parents, please sign below to indicate:

1. I have received and reviewed the complete class syllabus with my student. We understand that classroom rules, including the cell phone policy, will be enforced for both safety and academic success.
2. I have written my questions or concerns in the space provided below so Ms. Whitney can address them early. If that space is blank, it indicates I do not have any questions or concerns at this time, but I know how to reach Ms. Whitney in the future if needed.
3. I have read and discussed the syllabus and class expectations with my student for his/her/their mathcourse. My student understands what they mean and the consequences for disciplinary action.

Please check your preferred contact method (email is preferred):

- E-mail address: _____
- Cell phone: _____
- Home phone: _____

Questions? Concerns? Anything I should know about your student to help him, her, or they have a great year in Math?
